

Fig.8. The Ski-Kush (*S-Kush*), showing the three mechanisms that cause motion of *S-Kush*, they are, the *ExMF* ascending force (*F_{ExA}*) (or levitation *F_{ExL}*), the *ExMF* driving force (*F_{ExD}*) and the *ExMF* brake force (*F_{ExB}*). and 24 are diverted by ferromagnetic 2. Gyrating electron radiated synchrotron radiation [14], while the flight path is given by resultant force 27.
